

Dastard Inc - Petrification Department

Amber Scenescent MSc

Last updated: 02/04/2022

Project Raybands

Handheld petrification/depetrification ray
Code name: Project Raybands

Justification

To provide an emergency petrification of a dangerous patient.
To have the capacity to depetrify difficult to move patients.

Development

Assignment: **Dr D**
Email ceo@dastard.inc

Collaboration:

- Amber
Email amber.scenescent@dastard.inc
- Tex
Email tex@dastard.inc
Information technology

Onset: Dr D availability

Duration: Update with general petrification/depetrification protocol progression

Notes

The petrification ray utilises the relevant eye of a beholder suspended in cockatrice beak proteins. This is activated by a standard low intensity laser (< 0.5 Watts).

The depetrification ray reverses the polarity of the beholder eye using solid-light anti-magic technology. The standard low intensity laser (< 0.5 Watts) is filtered through a matrix of genetically modified basilisk digestive tract which overproduces depetrification enzyme.

Idk, this is your thing, Dastard!

Location

Assignment: **Rita**

Email rita.human-notdemon@dastard.inc

Supervisor: Amber

Email amber.scescent@dastard.inc

Collaboration:

- Dr D
Email ceo@dastard.inc

Onset: Immediate identification of subjects

Duration: Ongoing

Notes

Mobile petrification and depetrification. [See Project Puppies & Project Kitties subsection Location.]

Operation

Assignment: **Amber**

Email rita.human-notdemon@dastard.inc

Supervisor: Dr D
Email ceo@dastard.inc

Collaboration:

- Tex
Email: tex@dastard.inc
Information technology

Onset: Upon availability
Duration: ASAP

Notes

Uhhhhhhh...
Hey, Dastard: Training required.

Figure 1: Dastard Incorporated is not liable.
